		Expected outcome	To educate and train a person to a skill level of expertise in the domain of Fire & Industrial Safety. To develop skilled human resources by involving learners In-depth knowledge of fire science, industrial safety, and disaster management. Practical skills in firefighting equipment, emergency response, and risk assessment. Understanding of laws and standards like OSHA, NFPA, and Factory Act. Ability to conduct safety audits, inspections, and implement preventive measures. Leadership and communication skills for managing safety operations. Preparedness for emergencies and disaster response in various industries. Use of modern tools and technology in safety planning and fire modelling. Career readiness for jobs in education, industry, and research sectors. Ethical and professional responsibility in safety management roles. Foundation for higher studies and certifications like NEBOSH/IOSH.

		Outline of the Syllabus	The B.Sc. Environmental Science programme is uniquely designed to impart essential knowledge and skills in all major areas of Environmental Science. This programme is six / eight semesters spread over three/ four academic years, promoting innovation and flexibility following the 'Curriculum and Credit Framework' set forth by NEP2020. It incorporates a balanced mix of theoretical and practical courses, integrating Major (Core) Environmental Science courses with Vocational Skill Courses (VSC) and Skill Enhancement Courses (SEC). Additionally, students have the opportunity to select Open Electives (OEs), Ability Enhancement Courses (AECs), and Value Education Courses (VECs) from the respective pool of courses offered by the University. Semester I- In the first semester, learners are introduced to fundamental environmental concepts through Ecology and Ecosystem, which focuses on ecological principles and interactions within ecosystems and is complemented by practica	Curriculum and Pedagogy:-	Percentage of SLM developed by In- House Faculty	100

		Outline of the Syllabus	Semester 01 courses - Classical mechanics, electronic devices, mathematical methods in physics, and research methodology are all fundamental areas in the field of physics. Classical mechanics deals with the motion of objects and the forces that act upon them. Electronic devices involve the study of the behavior and design of electronic circuits and devices. Mathematical methods in physics provide the tools necessary for analyzing and solving complex physical problems, utilizing mathematical concepts. Finally, research methodology is essential for conducting scientific investigations, including experimental design, data analysis, and interpretation. These areas are interconnected, as a thorough understanding of classical mechanics and mathematical methods is essential for the development and analysis of electronic devices and for conducting meaningful research in physics.
