		Upload Approval of PPR (Minutes of the relevant signature)	View
		Expected outcome	The MCA program is designed to build comprehensive expertise in computer science, covering both theoretical foundations and advanced practical applications. It develops a deep understanding of core computing concepts such as data structures, algorithms, database management systems, and programming paradigms, while fostering proficiency across modern technology stacks including full-stack web and enterprise application development using Java, Python, and JavaScript frameworks. Learners gain exposure to emerging domains like Cloud Computing, Artificial Intelligence, Machine Learning, IoT, Cyber Security, and Mobile App Development. The program emphasizes software engineering principles, agile methodologies, quality assurance, and business analytics to prepare learners for complex industry challenges. Graduates acquire strong technical, analytical, and research skills alongside professional competencies in communication, collaboration, ethics, and project management. Emphasis on adaptability, critical thinking, innovation, and lifelong learning ensures that learners are equipped to thrive in dynamic global technology environments.

Learning Management System (LMS)

Counselling Process

Mode of Counselling :- YCMOU conducts real-time academic counselling sess

Brief describe the provision in LMS to be used by HEI :-

The University has deployed a state-of-the-art Learning Management System (LMS) designed to support effective delivery of online programmes in accordance with the UGC (Open and Distance Learning Programmes and Online Programmes) Regulations. The LMS facilitates technology-enabled, learner-centric, and outcome-based digital learning experiences through robust academic, administrative, and learner-support functionalities. Key Functional Features of the LMS Virtual Classrooms (Live Interactive Sessions)

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- https://lms.ycmouonline.ac.in/

Assessment mechanism	At YCMOU, Centre for Online Education, assessments are developed pedagogically with a strategic approach to meet the learning outcomes and are delivered online through the LMS. The Continuous Assessment Model of formative nature is distributed evenly throughout the syllabus in various categories: i. Objective-type questions embedded in Each Module of the course. ii. Application based questions at the end of each course. These assessments finally contribute towards the internal marks while evaluating and measuring the learning progress, skill acquisition, and achievement of learning outcomes of the learners.

Identified technological interface and interoperability	Technological Interface and Interoperability YCMOU has established a secure, scalable, and interoperable digital ecosystem to support online programme delivery in line with UGC regulations. The University uses the MKCL (Maharashtra Knowledge Corporation Limited) University Management System (UMS) for student lifecycle management, covering admissions, registrations, fee transactions, academic records, examination processes, certification, grievance redressal, and automated compliance reporting. A feature-rich Learning Management System (LMS) complements the UMS and ensures effective academic delivery through: Four Quadrant Approach based digital content (text, multimedia, interactive learning) Live interactive classes and recorded sessions Assignment and assessment management with rubrics Discussion forums and doubt-resolution tools Learner analytics, dashboards, and engagement monitoring Accessibility and mobile supported for inclusive learning Both platforms operate in an integrated environment using API/LTI standards, ensuring seamless data flow, secure authentication, and device-agnostic access. YCMOU's technology stack demonstrates a robust, learner-centric, and interoperable model, ensuring transparent governance, efficient academic services, and high-quality online learning as per UGC norms.
Learner's Authentication Requirements	YCMOU ensures a secure, credible, and academically compliant online learning environment through a structured learner authentication framework. At the time of online registration, every applicant must upload a valid Government-issued photo identity document for verification: Indian Nationals: Aadhaar Card / Driving Licence / PAN Card Foreign Nationals / NRIs: Valid Passport All submitted documents are verified by the Admissions Department to confirm the learner's identity before enrolment approval. Upon successful verification, each student is issued a unique enrolment number and an official university email ID. Students thereafter access the digital ecosystem through a Single Sign-On (SSO) secure portal, which provides authenticated entry to academic resources, LMS, communication channels, and assessment systems. This multi-layered authentication mechanism ensures: Secure learner identity validation Controlled and authorized access to academic systems Compliance with regulatory standards for academic integrity YCMOU's authentication protocol safeguards the integrity, transparency, and trustworthiness of its online education ecosystem.
Learner Registration - through a web application	Learner Registration – Web-Based Application System The Centre for Online Education at YCMOU administers a fully digital, structured, and secure learner registration process through a dedicated web-based application platform. The system ensures accuracy of information, eligibility compliance, and seamless access for applicants across geographies. The registration process consists of three stages: Submission of Personal Information & Identity Proof Applicants enter personal and contact details and upload a valid Government-issued identity document for initial verification. Academic Qualification & Eligibility Verification Candidates provide educational details and upload supporting academic certificates. These are reviewed to validate eligibility as per University admission norms. Programme Fee Payment & Enrolment Confirmation Upon successful verification, applicants make the programme fee payment through the online payment gateway. Completion of payment confirms enrolment in the chosen programme. This web-enabled registration framework ensures a transparent, compliant, secure, and learner-friendly process, forming the foundation for a fully digital academic experience at YCMOU Online.
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	Active Learner Engagement and Analytics At YCMOU, we focus on keeping learners actively involved in their studies and helping them stay on track throughout their learning journey. Our Learning Management System (LMS) includes built-in tools that track participation, monitor progress, and support timely academic guidance. How We Track and Support Learners 1. Monitoring Learning Activity The system records how often students log in, access lessons, submit work, and participate in discussions. Reports are generated at the university, programme, course, and individual level. Faculty can see each learner's activity and identify who may need extra help. Real-time data shows what learners are doing, where they are accessing content, and when they are active. 2. Helping Learners Stay Engaged Faculty use this information to offer support, reminders, and guidance whenever needed. Students receive notifications and alerts for classes, deadlines, and pending work. The system helps the university and faculty plan interventions to improve learning experiences and outcomes.
Payment Gateway –using Digital Payment system	Digital Payment Gateway The admission platform is integrated with a secure digital payment system, allowing students to pay their fees online. Multiple payment options are available, including debit cards, internet banking, and other approved online payment modes, ensuring a convenient and seamless fee payment experience for learners.
Tracking the delivery of a Course or programme	Tracking Course and Programme Delivery YCMOU follows a structured system to ensure that every online course is delivered effectively and supports student learning. 1. Before Delivery Courses are prepared in a standard format by Subject Matter Experts, Instructional Designers, and the LMS team. A readiness check and content audit ensure all learning materials, assessments, and resources are correctly placed in the LMS. 2. During Delivery A Quality Compliance Auditor monitors that only approved and updated material is delivered. Content is released through a Just-in-Time (JIT) approach to provide students with the right learning resources at the right time. 3. After Delivery Learner participation and progress are reviewed using analytics and activity reports. Faculty provide support and timely interventions to keep students engaged and on track.
Technical Know-how or Skills Requirements	YCMOU provides an onboarding orientation to help students become comfortable with the online learning platform. Learners are expected to have basic digital skills such as working with MS Word and MS Excel, submitting assignments, participating in discussion forums, attending online classes using tools like Google Meet, Zoom, or MS Teams, appearing for online examinations, and being open to learning new digital tools when required. These skills enable students to confidently navigate the online environment and engage fully in their academic activities. Faculty members also receive structured training to support effective digital teaching. They are expected to use the LMS for course delivery, managing assessments, and giving feedback; conduct live online sessions; share digital learning materials; apply online assessment and evaluation tools; interact with learners through discussion forums; and use analytics dashboards to track student progress and provide timely academic support. These competencies ensure that faculty can deliver high-quality, engaging, and student-centred online learning experiences.

Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-

ICT Facilities for Implementation of Online Courses YCMOU has established a dedicated and robust ICT ecosystem to support the delivery, administration, and monitoring of online programmes in compliance with UGC norms. The University operates a cloud-hosted, scalable, and secure digital infrastructure that integrates all major academic and student-support functions. The Learning Management System (LMS) facilitates online content delivery, live and recorded sessions, assignments, assessments, discussion forums, and learning analytics. It is fully integrated with the University Management System (UMS/SIS) for seamless learner lifecycle management from enrolment to graduation. A secure Single Sign-On (SSO) enables smooth navigation across platforms, while a mobile-friendly interface ensures learning access anytime, anywhere. Applications and learner data are safeguarded through enterprise-grade firewalls, DLP controls, and 24/7 security monitoring, ensuring data privacy and system integrity. Student support services are enabled through an integrated helpdesk system (Freshdesk/WhatsApp/SMS/Email), ensuring timely resolution of academic and administrative queries. A cloud-based communication and CRM/Lead-Management system supports counselling, admissions outreach, and student engagement. The entire ICT infrastructure is managed by a dedicated in-house technology team, including software developers, server and network administrators, ensuring continuous improvement and uninterrupted digital services. This comprehensive ICT framework ensures reliable access, secure digital operations, and a high-quality, learner-centric online education experience.
